SCALE FOR PROJECT LEONARDO JAVA DAY-07 (/PROJECTS/LEONARDO-JAVA-DAY-07)

You should evaluate 1 student in this team

Git repository

git@vogsphere.42roma.it:vogsphere/intra-uuid-ebd6bd67-9df1-

Introduction

The methodology of School 21 makes sense only if
peer-to-peer assessments are done seriously.
This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all communications during this assessment. The bond of trust between community 21 and you depends on it.
- Highlight possible malfunctions of the work done by the person and take the time to discuss and debate it.
- Keep in mind that sometimes there can be differences in interpretation of the tasks and the scope of features. Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT repository of the student or group.
- Doublecheck that the GIT repository is the one corresponding to the student or the group as long as to the project.
- Meticulously check that nothing malicious has been used to mislead you and have you assess something except the content of the official repository.

- If you have not finished the project yet, it is compulsory to read the entire instruction before starting the review.

Copied

- Use the special flags in the scale to report an empty or non-functional solution as long as a case of cheating.

In these cases, the assessment is completed and the final grade is 0 (or in a case of cheating is -42).

However, except for a case of cheating, you are encouraged to continue reviewing the project to identify the problems that caused the situation in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise even if the following exercises are correct.

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work at any time during the assessment.
- The general rules and any rules specific to the day are respected throughout the assessment.

☒ Yes

☐ No

Piscine Java | MODULE 07

Exercise 00 – Work with Classes

- Are there at least 2 classes in the classes package?
- Does each of these classes meet the requirements for its content?
- Does the program operate correctly for each of these classes?
- Does the program output comply with the task?
- Will the program operate correctly if you include your correct class in the classes package?

☒ Yes

☐ No

Exercise 01 – Annotations – SOURCE

- Do annotations have RetentionPolicy.SOURCE specified?
- Are HTML forms generated when mvn clean compile is executed?
- Does the system generate forms in the target/classes folder?
- Does the program work properly when you include your correct class in the project?
- Open the generated form in a browser. Use the browser developer tools to make sure the form is submitted correctly. Is output in compliance? (see in attachments)

Copied

✓ Yes

✗ No

Exercise 02 – ORM

- Do annotations have RetentionPolicy.RUNTIME specified?
- Do classes marked with @OrmEntity annotation comply with requirements?
- Does application output the generated SQL code onto the console during execution?
- Does length parameter of @OrmEntity annotation affect the table row length?
- Does name parameter of @OrmEntity annotation affect the table column name?
- Are all three methods implemented correctly in OrmManager?
- Does OrmManager remove the already created tables?

✓ Yes

✗ No

Ratings

Don't forget to check the flag corresponding to the defense

✓ Ok

★ Outstanding project

Empty work

📄 No author file

🧠 Invalid compilation

📋 Norme

📄 Cheat

💣 Crash

💧 Leaks

🚫 Forbidden function
