SCALE FOR PROJECT LEONARDO JAVA DAY-04 (/PROJECTS/LEONARDO-JAVA-DAY-04)

You should evaluate 1 student in this team

★

Git repository

`git@vogsphere.42roma.it:vogsphere/intra-uuid-9bbae4ed-aaf0-`   📋

Introduction

The methodology of School 21 makes sense only if
peer-to-peer assessments are done seriously.
This document will help you to do it properly.

- Please, stay courteous, polite, respectful and constructive in all
communications during this assessment. The bond of trust
between community 21 and you depends on it.

- Highlight possible malfunctions of the work done by the person
and take the time to discuss and debate it.

- Keep in mind that sometimes there can be differences
in interpretation of the tasks and the scope of features.
Please, stay open-minded to the vision of the other.

Guidelines

- Evaluate only the files that are on the GIT
repository of the student or group.

- Doublecheck that the GIT repository is the one
corresponding to the student
or the group as long as to the project.

- Meticulously check that nothing malicious has been used
to mislead you and have you assess something except
the content of the official repository.

- If you have not finished the project yet, it is compulsory
to read the entire instruction before starting the review.

- Use the special flags in the scale to report an empty
or non-functional solution as long as a case of cheating.
In these cases, the assessment is completed
and the final grade is 0 (or in a case of cheating is -42).
However, except for a case of cheating, you are encouraged to continue
reviewing the project to identify the problems that caused the situation
in order to avoid them for the next assessment.

- You must stop giving points from the first wrong exercise
even if the following exercises are correct.

Preliminaries

Respect the rules

- The repository contains the work of the student (or group).
- The student is able to explain their work at any time during the assessment.
- The general rules and any rules specific to the day are respected throughout the assessment.

⬗ Yes   ✕ No

Piscine Java | MODULE 04

Exercise 00 – Packages

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does the program output your image correctly?
- Does project structure comply with the task?

⬗ Yes   ✕ No

Exercise 01 – First JAR

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does executing instructions in README.txt file result in a valid application startup?
- Does project structure comply with the task?

☑ Yes   ✕ No

Exercise 02 – JCommander & JCDP

- Is there a README.txt file containing a description of commands?
- Does executing instructions in README.txt file result in creating valid content in target folder?
- Does executing instructions in README.txt file result in a valid application startup?
- Are JCommander mechanisms used to process command-line parameters?
- Does project structure comply with the task?

☑ Yes   ✕ No

Ratings

Don't forget to check the flag corresponding to the defense

✔ Ok   ★ Outstanding project

Empty work   ■ No author file   💀 Invalid compilation   🎵 Norme   Cheat   ☢ Crash

💧 Leaks   🚫 Forbidden function

Conclusion
